# Executive Summary

---

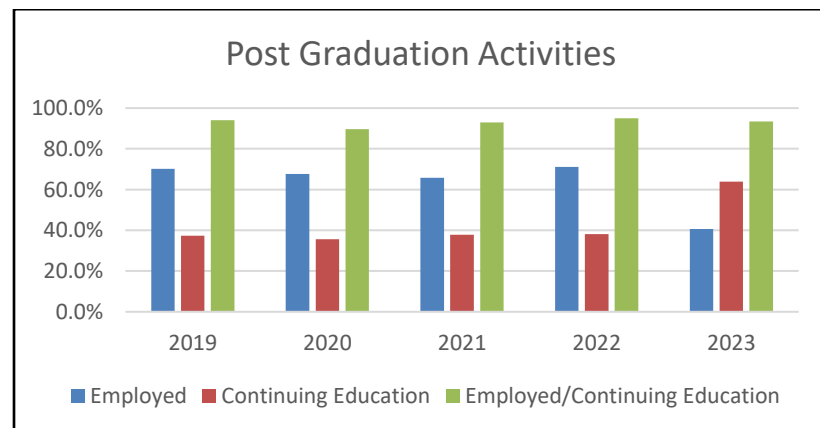

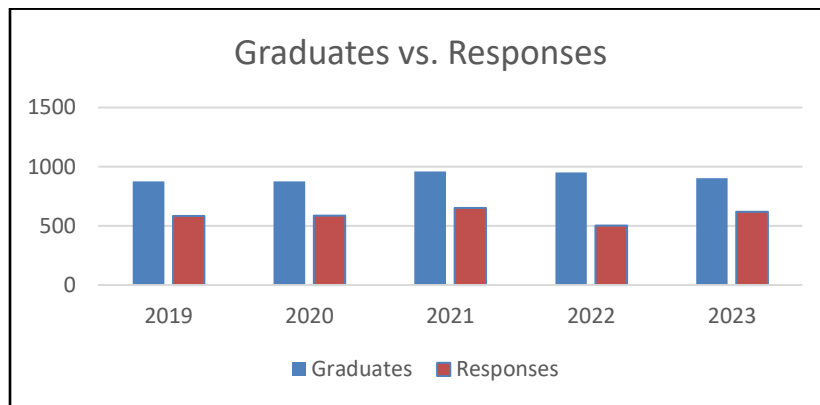

The Graduate Outcome Report is a summary of employment and continuing education decisions made by Lehigh Carbon Community College graduates who completed degrees during the 2022-2023 academic year.

Who had the opportunity to take the survey: The survey was distributed via our Graduate Fair held in May of 2023, written correspondence through the mail, emails (utilizing Survey Monkey) and telephone surveys. Additional resources, such as the National Student Clearinghouse and social media, have been utilized to extract data and as a verifying source.

How the data was collected: Students who did not complete a graduate survey at the graduation fair were sent letters that included return paid postage. As a follow-up, emails were sent two to three months after. Over a period of six months after graduation, additional reminder emails and letters were distributed for completion. If responses were not received, Career Development staff contacted graduates to complete the survey over the telephone. In addition, staff gathered student knowledge rate data (defined by the National Association of Colleges and Employers) via current social media profiles and through the National Student Clearinghouse. Knowledge Rate: The LCCC total knowledge rate is 68.6%. Out of 904 graduates, there were 620 reported student outcomes.

Career Outcomes Definition: Respondents that are either working as an employee, freelancer, contract worker, accepted in a program of additional education, in the military or in a service position (AmeriCorps, Peace Corps, etc.).

Career and Continuing Education Outcomes Rate: The LCCC total career outcome rate is 40.8%. Continuing education outcome rate is 64.2%. Of the 620 respondents, 253 had outcomes related to a career and 580 related to continuing education.
