aking7@lccc.edu

I earned my master's degree in Biology from Bloomsburg University of Pennsylvania in 2016. I have previous industry experience with forensics and research. I began at LCCC as an adjunct in the fall 2018 semester and I became a full-time faculty member teaching in the Science Division in 2019. My passion is in molecular biology but I am happy to discuss anything relating to science.

I have experience using the following course formats: online, face to face, remote and KanDao remote/face-to-face mixed sections. Additionally, I have experience adapting face-to-face instruction to challenging environments. For example, I have taught environmental science to incarcerated students at SCI Frackville. I am also part of a group of individuals in the Science Division that developed effective laboratory kits for Biology laboratories. I thoroughly enjoy the challenge of creating new materials for courses and would be happy to assist with it during coaching.

Furthermore, I have extensive experience in helping troubled students complete their coursework through the Student Success Coach Program and the Student Recovery Coach Program. I look forward to and welcome any inquiries regarding coaching.
